

UNI PAL

pal-let-ize

/'pɑ:lɪtɪz/ verb.

to stack and package (freight) on pallets for efficient shipping and handling

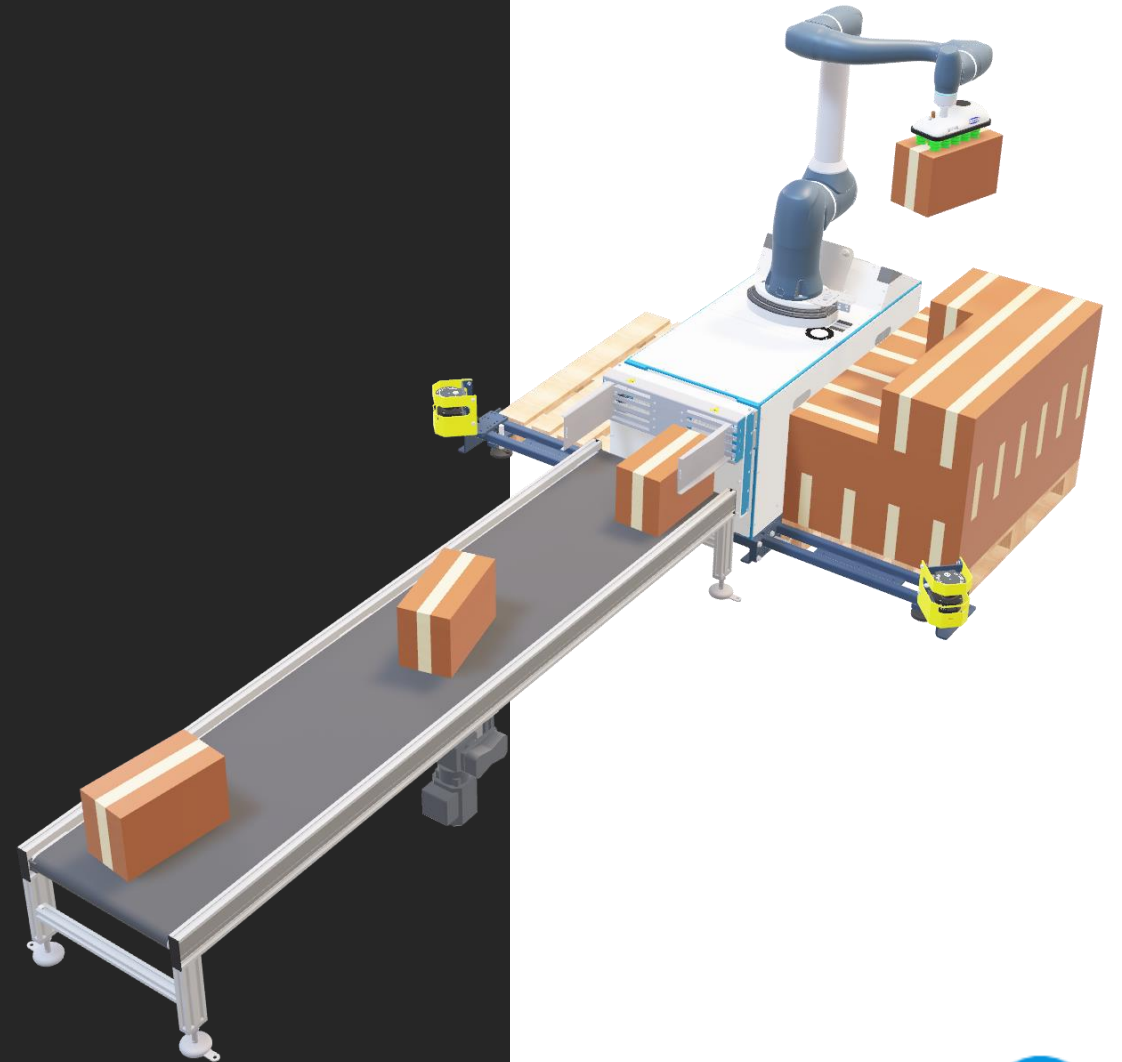

BE READY FOR TOMORROW, [TODAY.](#)

UNIPAL

WORK SMART, NOT HARD.

Handling packages has never been easier. UNIPAL takes over the monotonous and physically demanding work of your staff. UNIPAL is suited for palletizing end-of-line or depalletizing and induction into your warehouse systems. Our [no-code approach](#) allows you to choose the stacking pattern you need or let the software decide on its own. Thanks to our modular design, UNIPAL can be adapted easily and cost-effectively to your environment. We offer maximum flexibility: Mixed package sizes? Our palletizing software manages it. No suction-capable packages? We adjust the gripper for you. No matter if [packages](#), [bags](#) or [boxes](#). We can literally handle anything. Don't want a safety fence around the robot? Choose the [cobot-option](#). Need a higher level of self-sufficiency? Add a [pallet dispenser](#). The possibilities are endless.

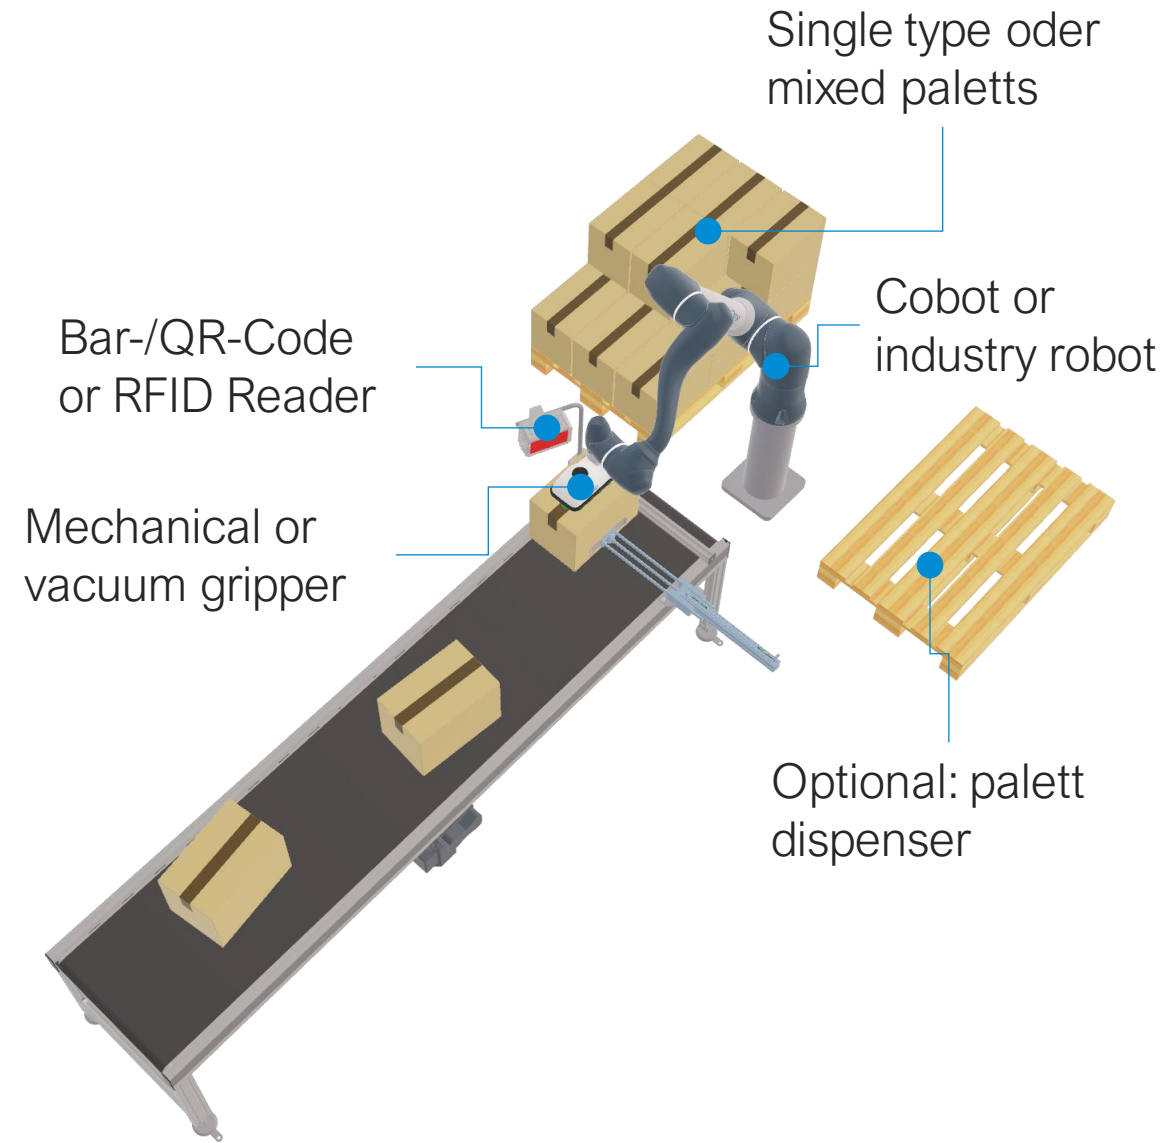

BE READY FOR TOMORROW, [TODAY](#).

UNIPAL

WORK SMART, NOT HARD.

OPTIONS

Function	Palettizing	Depalettizing / Induction	
Single-type or mixed parcels	Single-type	Mixed	
Goods supply and discharge	AGV/AMR	Conveyor Belt	Chute
Goods supply and discharge	Palett	Bin	
Type of robot	Industry robot	Cobot	
Type of gripper	vacuum	mechanical	
Type of parcel identification	Bar-code	QR-code	RFID
Optional palett dispenser	Yes	No
