

# UNIDO

**do**  
/du:/ verb.

to perform an action, the precise nature of which is often unspecified

## DO, CHECK. REPEAT.

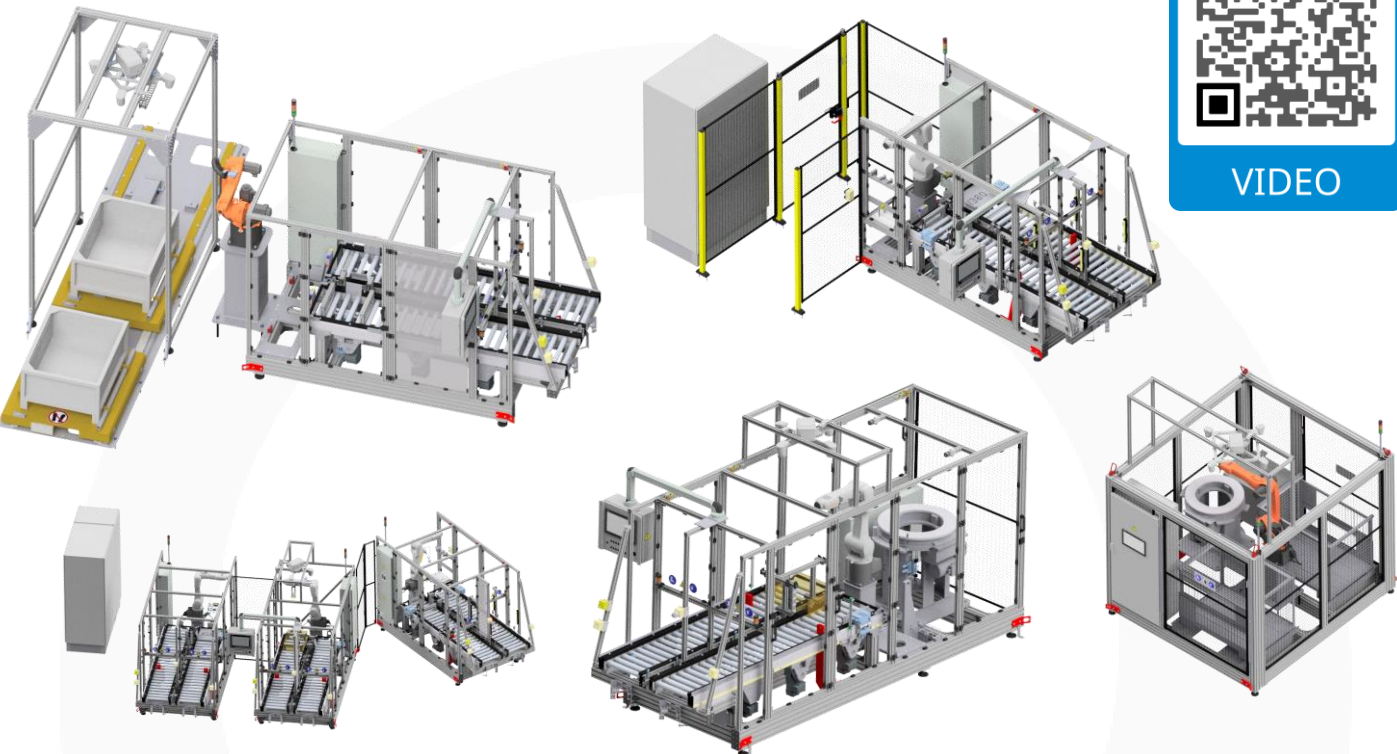

[Automation](#) and [versatility](#) have traditionally been perceived as conflicting principles, but with **UNIDO**, we've bridged the gap. Whether you're in need of a solution as straightforward as loading trays from a bulk flow of parts or as intricate as complex assembly, testing, labeling, engraving, and other tasks, **UNIDO** has been designed as a [modular system](#) to meet your exact requirements.

Our modular approach allows you to seamlessly combine different modules, transforming **UNIDO** into a production machine of its own. It can handle tasks such as [assembly, testing, fault detection and rejection if needed, labeling and many more](#). What sets **UNIDO** apart is its adaptability; tasks on the revolving table can be easily adjusted as your needs evolve, enabling the execution of multiple projects on a single machine, thereby enhancing the profitability of your investment.

**UNIDO** can use a [wide range of material infeed and outfeed options](#), from handling loose bulk flow directly from pallet boxes using advanced bin picking technology to integrating seamlessly with roller conveyors featuring AGV connectivity, RFID interfaces, and robust data communication with your ERP or production management system. With a [cycle time of < 5 seconds](#), it empowers you to achieve exceptional levels of productivity.

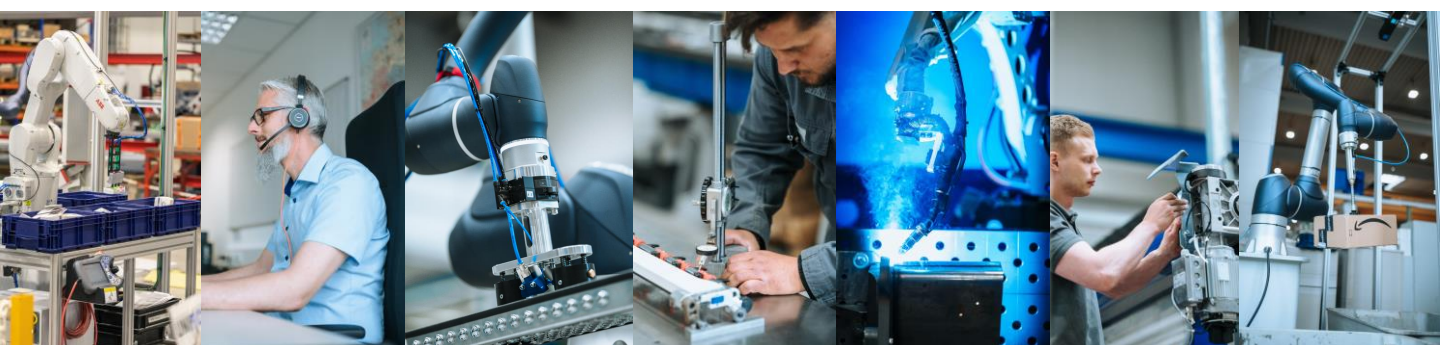

Thanks to its self-contained system design, **UNIDO** offers a quick start-up process, presenting a true [plug-and-play functionality](#). Additionally, its inherent flexibility allows for [easy relocation](#), eliminating the constraints associated with fixed installations.

# MODULARITY AT ITS BEST:

## ABOUT US:

-  **Over 20 years of automation excellence**  
For two decades, QTM has been at the forefront of delivering customized automation solutions.
-  **Globally trusted by 850+ customers across 55 countries**  
From packaging to automotive industry and logistics, we've left our mark in diverse industries, providing end-to-end support from initial concept to after-sales services.
-  **Revolutionizing the way you experience automation**  
We're condensing our automation expertise into modular, small-scale and ready-to-operate automation solutions – without the costly and time-consuming way of developing customized one-off solutions.
-  **Seeing is believing!**  
Don't take our word for it—come and witness our capabilities firsthand! Visit our location in Schwalmtal (NRW, Germany). Contact us today to schedule your visit.
