

# UNIPAL

## pal-let-ize

*/'pɑ:lɪtʌɪz/* verb.

to stack packages (freight) on pallets for efficient shipping and handling

## STOP WORKING HARD, START WORKING SMART.

Handles different types and sizes of carton boxes, bags and totes with weights up to 22 kg

Plug-and-play: UNIPAL only requires a standard 230 V outlet (optional: 6 bar air pressure)

Intuitive operations via touch display incl. on- and offline generation of new packing schemes

Easily moved to another operation location, as UNIPAL does not require any stationary safety equipment

Customizing options: Intermediate sheet, palette dispenser, code reader AGV-interface etc.

By using laser area-scanners, UNIPAL can be operated at high speeds despite the collaborative functionality

We believe that nobody has to perform monotonous, physically demanding tasks any more today. **Humans** are made for **more fulfilling, challenging and creative tasks**. **UNIPAL** takes care of palletizing and depalletizing of carton boxes, bags and totes - whether for **end-of-line** in your production facility or for induction into your **warehouse**. Intuitive operation and true **collaboration** in close proximity to humans make **UNIPAL** the ideal tool for relieving your employees from physical labor and freeing up otherwise tied-up human resources for more complex tasks.

## ABOUT US:

### Over 20 years of automation excellence

For two decades, QTM has been at the forefront of delivering customized automation solutions.

### Globally trusted by 850+ customers across 55 countries

From packaging to automotive industry and logistics, we've left our mark in diverse industries, providing end-to-end support from initial concept to after-sales services.

### Revolutionizing the way you experience automation

We're condensing our automation expertise into modular, small-scale and ready-to-operate automation solutions – without the costly and time-consuming way of developing customized one-off solutions.

### Seeing is believing!

Don't take our word for it—come and witness our capabilities firsthand! Visit our location in Schwalmatal (NRW, Germany). Contact us today to schedule your visit.
