

# UNIWELD

**weld**

/weld/

verb.

to join together (metal parts) by heating the surfaces to the point of melting

## PERFECT WELDING. EVERYTIME.

Leverages the productivity of your existing workforce to reduce the workload of repetitive and safety-critical tasks.

Configurable to ensure optimal production flow for your parts

Automated welding ensures consistent quality – even across machines. Faulty parts are identified and automatically rejected.

For complex shapes and multiple welding operations, several **UNIWELD** machines can be combined

Don't let [staff shortages](#) become the [bottleneck](#) of your project: Welding is a specialized skill that requires years of training and experience to master. Skilled welders are in high demand so [leveraging the productivity](#) of each employee is critical. Once setup by an experienced welder, **UNIWELD** takes over the monotonous, [safety critical](#) and physically demanding work of your welder, thereby multiplying the productivity of your existing staff.

**UNIWELD** is incredibly versatile: They can be programmed to handle various welding tasks, from simple weld on pipes and tanks to complex frames. This adaptability allows businesses to [tackle a wide range of projects with a single machine](#). The fixture for each part is easily changed. Each fixture contains a chip that automatically identifies which part is to be produced and loads the required program for repeated jobs. The **UNIWELD** setup is also configurable to ensure an [optimal production flow](#) - optionally including a [handover robot](#) between the different welding stations for a [fully automated production](#) of complex parts with multiple welding operations.

# MODULARITY AT ITS BEST:

## ABOUT US:

Over 20 years of automation excellence

For two decades, QTM has been at the forefront of delivering customized automation solutions.

Globally trusted by 850+ customers across 55 countries

From packaging to automotive industry and logistics, we've left our mark in diverse industries, providing end-to-end support from initial concept to after-sales services.

Revolutionizing the way you experience automation

We're condensing our automation expertise into modular, small-scale and ready-to-operate automation solutions – without the costly and time-consuming way of developing customized one-off solutions.

Seeing is believing!

Don't take our word for it—come and witness our capabilities firsthand! Visit our location in Schwalmtal (NRW, Germany). Contact us today to schedule your visit.
