

UNIPAL

pal-let-ize

/ˈpɑːlɪtʌɪz/ verb.

to stack packages (freight) on pallets for efficient shipping and handling

Pay-per-Use
(PPU) Financing
from 0,03 €/pcs.
or ~ 10 €/h

STOP WORKING HARD, START WORKING SMART.

Handles different types and sizes of carton boxes with weights up to 22 kg and stacks up to 2.200 mm in height

Plug-and-play: UNIPAL only requires a standard 230 V outlet (optional: 6 bar air pressure)

Intuitive no-code operations via touch display incl. creation of new packing schemes

Easily moved to another operation location, as UNIPAL does not require any stationary safety equipment

Customizing options: Slip sheet insertion, code reader, telescopic conveyer belt AGV-interface etc.

By using laser area-scanners, UNIPAL can be operated at high speeds despite the collaborative functionality

We believe that nobody has to perform monotonous, physically demanding tasks any more today. **Humans** are made for **more fulfilling, challenging and creative tasks**. **UNIPAL** takes care of palletizing and depalletizing of carton boxes, bags and totes - whether for **end-of-line** in your production facility or for induction into your **warehouse**. Intuitive operation and true **collaboration** in close proximity to humans make **UNIPAL** the ideal tool for relieving your employees from physical labor and freeing up otherwise tied-up human resources for more complex tasks.
